

To Whom It May Concern:

I heard that you are proposing to expand LPFM stations which would allow priority over access to FM stations. I listen to K-LOVE (94.3) in the Chicago area, which is broadcast from Elgin. It may be one of the stations that would be affected by this possible change. I would like to see this station and others like it stay on the air and have the same priority as they have now.

The songs encourage me and embody my core values and beliefs. When it first came out, I e-mailed all my friends to tell them about K-LOVE and they were glad to hear about it. K-LOVE is heard all over the country and I believe it gives hope and answers to the questions people have about life, especially at this time in our lives when everything around us is in turmoil.

Please keep the current FM translator service on the air, so the stations that offer this kind of encouragement can continue to stay on the air.

Thank you for your time!

Kimberly Balles
